

V5 in March.flc

March 2, 2001 to March 5, 2001

DONE 7. - Cut {##FlowChartItem##Left,Top,Width,Height, Text,Tag1,Tag2,Tag3,...} in program only, much easier: I would have to create a mClipboard class based on FClipboard object

DONE 8. - Copy

DONE 9. - Paste

DONE 2. - Duplication

13. - Multiple-object selection w/ rubber band rectangle (HARD) 1. Write to actually select objects 2. Write other code to select lines 3. Write code to store the selected objects 4. Write more code so that once you select objects, you can move it, copy it, resize it

- Copy && cut with multiple selection

DONE 12. - Change fonts for specific objects (Tag2)

DONE 10. - Drag-drop open

11. - Drag-drop insert picture

DONE - Displaying the && character e.g. &V

DONE 1. - In picture, no text can be changed (disable text menu like in a circle or line)

DONE 3. - Percentage scaling & properties for pictures

DONE 4. - Save as a picture the displayed area (new picture box or in the same displayed one)

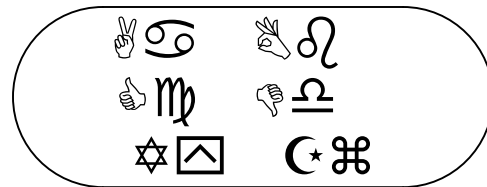

DONE 5. - Information about the printer in the help menu (write to log)

DONE 6. - text box to fit all the text

Newer loading and saving stuff

clipboard class

Keyboard font size change Ctrl+Shift+< and >

Flow Chart V4+ File

Private Type FTHeaderData

Version As Single {5.0 is the most recent}

FontName As String

FontSize As Currency

Zoom As Integer 'won't be too large

ScrollX As Integer 'like in V/H ScrollBar {in 10 000 parts}

ScrollY As Integer {same as ScrollX}

PaperSize As Integer 'For Printer

Orientation As Integer 'For Printer

PScaleWidth As Single 'For Printer

PScaleHeight As Single 'For Printer

Header1PDevName As String {printer device name}

Header2 As String

Header3 As String

Header4 As String

Header5 As String

End Type

Private Type FTEntry

FlowItemType As String

Left As Single {V5 all in twips, V4 in pixels}

Top As Single

Width As Single

Height As Single

Text As String 'remember it contains text alignment 0; text {chr 191}

DrawOrder As Integer '1 to 3

Tag1 As String {b i + + - -}

Tag2 As String

Tag3 As String

End Type

Rich Pad Flags

.TXT:DELTAGS {deletes all preceding tags}

.LOG {puts in a date stamp every time the file is opened}

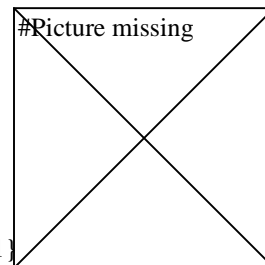

.TXT:VERSION 1.0

.TXT:SAVEAS My File.txt

.TXT:TITLE My File

.TXT:MSG Type in your message here to be displayed when opened.

.TXT:COMMENT Type in your comment here.

Richard Fung, 2001.

Printed from Flow Chart program.
